NEIL PATRICK Y. ATIENZA

IT Student | Software Developer | Web & Mobile Developer

Odiongan, Romblon, Philippines | patienza860@gmail.com | 0910 376 3750 | github.com/neilpatri

PROFESSIONAL SUMMARY

Fourth-year Bachelor of Science in Information Technology student with hands-on experience developing web, mobile, and AI-powered applications. Proficient in JavaScript, Java, Python, and SQL, with experience using Node.js, NPM, Android Studio, Capacitor, Firebase, Supabase, and API integration. Experienced in developing application logic, database-driven systems, authentication and authorization features, software integrations, and administrative systems. Strong logical and analytical thinking with a practical approach to programming, software development, debugging, and problem-solving.

PROJECT EXPERIENCE

SVConnect — Mobile Application & Web Administration System *Main Developer | January 2025*

- Developed SVConnect mobile application and core administrative modules, including key financial features, giving cooperative members a functional platform to manage transactions digitally.
- Designed Firebase Realtime Database structures and implemented authentication and authorization, securing role-based access to financial and member data.
- Collaborated with a development team to integrate front-end and backend components using JavaScript, Tailwind CSS, and Capacitor, producing a stable cross-platform system ready for deployment.

PIDAS — Power Foods Inventory & Delivery Administration System *Developer | June 2026*

- Developed a centralized web-based system consolidating product, inventory, delivery, driver, and vendor records into a single platform for Power Foods.
- Designed database structures and administrative features using Supabase, organizing business records for faster, more accurate monitoring.
- Applied systematic debugging and problem-solving to identify and resolve software issues, improving the reliability of core system functions.

JARVIS — AI Voice Assistant *Developer | April 2026*

- Developed a real-time AI voice assistant using Python, LiveKit, and Google Gemini Realtime, capable of interpreting spoken commands and generating natural responses.
- Integrated multiple APIs and real-time communication services, enabling seamless coordination between AI processing and voice output.
- Tested and connected application components end-to-end, achieving stable performance during live voice interactions.

WORK EXPERIENCE

Music Tutor *Weekend Work*

Sounds of Grace Music Studio — Private Music Instruction

- Provided structured music instruction while adapting explanations and learning approaches to individual students.
- Managed lesson schedules and maintained consistent communication with students and parents.
- Developed communication, discipline, responsibility, patience, and problem-solving skills through long-term student interactions.

EDUCATION

Romblon State University — Main Campus

Bachelor of Science in Information Technology (BSIT) — 4th Year

Brgy. Liwanag, Odiongan, Romblon 5505, Philippines

TECHNICAL SKILLS

Programming & Development

JavaScript, Java, Python, HTML, CSS, SQL / MySQL, Node.js, NPM, Tailwind CSS

Database & Backend

MySQL, Firebase Realtime Database, Firebase Authentication & Authorization, Supabase, Database Management, API Integration

Development Tools

Git & GitHub, VS Code, NetBeans, XAMPP, Figma, Capacitor, Android Studio

AI & System Integration

AI Tools & AI Application Development, Software Troubleshooting, UI/UX Development, System Integration, Basic Linux Fundamentals, System Testing & Issue Identification

Certifications

Certified Artificial Intelligence Security & Risk (Red Team), Introduction to Cybersecurity (Cisco), Networking Basics (Cisco), Introduction to Packet Tracer (Cisco)
